

Two-Step Equations – Decimals

$$5.21 - 10.9p = 9.57$$

$$4.62(2.64x + 8.25) = 0$$

$$11.57 = \frac{s + 22.74}{0.7}$$

$$\frac{0.7u}{0.2} = 9.5 - 1.5u$$

$$\frac{a - 7.3}{4.5} = 2.4$$

$$2.58q + 34.23 = 42.1 - 1.42q$$
