

## Two-Step Equations

$$\frac{z}{3} + 4 = \frac{5}{6}$$

$$\frac{m + 2}{-3} = \frac{2}{5}$$

$$-40.04 - 12.76w = 36.52$$

$$\frac{k}{3} = k + 6$$

$$3a - 34.56 = 17.01$$

$$5(3x + 2) = 10$$
