

Adding Like Fractions

$$\frac{5}{4} + \frac{6}{4} + \frac{9}{4} = \square$$

$$\frac{8}{2} + \frac{6}{2} + \frac{4}{2} = \square$$

$$\frac{8}{7} + \frac{8}{7} + \frac{9}{7} = \square$$

$$\frac{12}{9} + \frac{10}{9} + \frac{15}{9} = \square$$

$$\frac{15}{10} + \frac{13}{10} + \frac{12}{10} = \square$$

$$\frac{8}{6} + \frac{7}{6} + \frac{10}{6} = \square$$

$$\frac{18}{8} + \frac{15}{8} + \frac{12}{8} = \square$$

$$\frac{12}{5} + \frac{9}{5} + \frac{6}{5} = \square$$

$$\frac{8}{3} + \frac{6}{3} + \frac{7}{3} = \square$$

$$\frac{12}{11} + \frac{15}{11} + \frac{21}{11} = \square$$

$$\frac{6}{4} + \frac{7}{4} + \frac{8}{4} = \square$$

$$\frac{11}{9} + \frac{11}{9} + \frac{11}{9} = \square$$

$$\frac{9}{6} + \frac{8}{6} + \frac{7}{6} = \square$$

$$\frac{5}{2} + \frac{7}{2} + \frac{6}{2} = \square$$

$$\frac{17}{7} + \frac{22}{7} + \frac{9}{7} = \square$$
