

Adding Like Fractions

$$\frac{2}{5} + \square = \frac{4}{5}$$

$$\square + \frac{4}{7} = \frac{6}{7}$$

$$\frac{2}{9} + \square = \frac{7}{9}$$

$$\square + \frac{1}{8} = \frac{7}{8}$$

$$\frac{1}{4} + \square = \frac{3}{4}$$

$$\square + \frac{3}{6} = \frac{5}{6}$$

$$\frac{1}{5} + \square = \frac{4}{5}$$

$$\square + \frac{5}{11} = \frac{9}{11}$$

$$\frac{4}{9} + \square = \frac{7}{9}$$

$$\square + \frac{3}{8} = \frac{6}{8}$$

$$\frac{2}{8} + \square = \frac{3}{8}$$

$$\square + \frac{2}{7} = \frac{3}{7}$$

$$\frac{1}{6} + \square = \frac{4}{6}$$

$$\square + \frac{5}{10} = \frac{9}{10}$$

$$\frac{5}{7} + \square = \frac{6}{7}$$

$$\square + \frac{1}{4} = \frac{2}{4}$$

$$\frac{5}{10} + \square = \frac{8}{10}$$

$$\square + \frac{3}{9} = \frac{6}{9}$$

$$\frac{8}{11} + \square = \frac{10}{11}$$

$$\square + \frac{7}{12} = \frac{11}{12}$$
