

Converting Improper Fractions to Mixed Numbers

Convert each improper fraction to a mixed number.

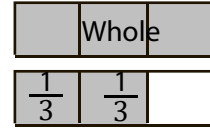

Example:

$$\frac{5}{3}$$

Out of two blocks, one shaded full and the other shaded two-third.

$$\text{Mixed Number} = 1\frac{2}{3}$$

Improper Fraction	Picture Representation	Mixed Number
$\frac{17}{6}$		
$\frac{39}{11}$		
$\frac{19}{7}$		
$\frac{28}{9}$		
$\frac{43}{8}$
