

Equivalent Fractions

Example:

Shaded part = $\frac{1}{2}$

Split each part into two equal pieces.

Shaded part = $\frac{2}{4}$

Therefore, $\frac{1}{2} = \frac{2}{4}$

Split each part into 3 equal pieces

$$\frac{1}{2} = \frac{\quad}{\quad}$$

Split each part into 5 equal pieces

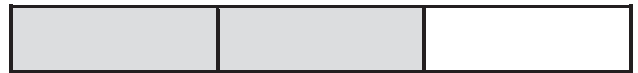

$$\frac{1}{2} = \frac{\quad}{\quad}$$

Split each part into 2 equal pieces

$$\frac{1}{3} = \frac{\quad}{\quad}$$

Split each part into 4 equal pieces

$$\frac{2}{3} = \frac{\quad}{\quad}$$

Split each part into 3 equal pieces

$$\frac{3}{4} = \frac{\quad}{\quad}$$

Split each part into 4 equal pieces

$$\frac{1}{4} = \frac{\quad}{\quad}$$

Split each part into 2 equal pieces

$$\frac{3}{5} = \frac{\quad}{\quad}$$

Split each part into 3 equal pieces

$$\frac{4}{5} = \frac{\quad}{\quad}$$
