

Multiplying Fractions with Cross Canceling

$$\frac{6}{5} \times \frac{10}{2} = \square$$

$$\frac{3}{2} \times \frac{4}{3} = \square$$

$$\frac{9}{4} \times \frac{4}{3} = \square$$

$$\frac{5}{2} \times \frac{7}{5} = \square$$

$$\frac{9}{4} \times \frac{8}{3} = \square$$

$$\frac{3}{2} \times \frac{10}{5} = \square$$

$$\frac{7}{3} \times \frac{10}{7} = \square$$

$$\frac{6}{5} \times \frac{5}{2} = \square$$

$$\frac{7}{5} \times \frac{10}{2} = \square$$

$$\frac{6}{5} \times \frac{4}{3} = \square$$

$$\frac{10}{4} \times \frac{8}{3} = \square$$

$$\frac{9}{5} \times \frac{5}{4} = \square$$

$$\frac{8}{5} \times \frac{10}{3} = \square$$

$$\frac{9}{4} \times \frac{6}{3} = \square$$

$$\frac{6}{4} \times \frac{5}{2} = \square$$
