

## Multiplying Three Fractions

WS #1

$$\frac{8}{6} \times \frac{7}{4} \times \frac{3}{2} = \square$$

$$\frac{3}{2} \times \frac{5}{4} \times \frac{6}{3} = \square$$

$$\frac{10}{5} \times \frac{4}{2} \times \frac{5}{4} = \square$$

$$\frac{9}{8} \times \frac{6}{4} \times \frac{8}{3} = \square$$

$$\frac{7}{5} \times \frac{12}{6} \times \frac{10}{6} = \square$$

$$\frac{8}{6} \times \frac{4}{3} \times \frac{12}{4} = \square$$

$$\frac{11}{10} \times \frac{12}{11} \times \frac{13}{12} = \square$$

$$\frac{5}{4} \times \frac{3}{2} \times \frac{6}{5} = \square$$

$$\frac{10}{7} \times \frac{6}{5} \times \frac{7}{2} = \square$$

$$\frac{6}{2} \times \frac{4}{3} \times \frac{3}{2} = \square$$
