

Multiplying Three Fractions

$$\frac{5}{9} \times \frac{4}{6} \times \frac{12}{15} = \square$$

$$\frac{3}{4} \times \frac{1}{10} \times \frac{5}{6} = \square$$

$$\frac{3}{4} \times \frac{10}{12} \times \frac{1}{2} = \square$$

$$\frac{8}{10} \times \frac{2}{9} \times \frac{3}{4} = \square$$

$$\frac{7}{8} \times \frac{5}{14} \times \frac{6}{10} = \square$$

$$\frac{4}{14} \times \frac{3}{8} \times \frac{7}{9} = \square$$

$$\frac{11}{12} \times \frac{6}{8} \times \frac{6}{11} = \square$$

$$\frac{4}{9} \times \frac{6}{8} \times \frac{3}{4} = \square$$

$$\frac{3}{8} \times \frac{8}{9} \times \frac{2}{3} = \square$$

$$\frac{6}{10} \times \frac{3}{4} \times \frac{5}{6} = \square$$
