

Multiplying Fractions

$$\frac{8}{9} \times \frac{4}{5} = \square$$

$$\frac{2}{7} \times \frac{6}{7} = \square$$

$$\frac{5}{11} \times \frac{4}{9} = \square$$

$$\frac{8}{9} \times \frac{7}{13} = \square$$

$$\frac{5}{9} \times \frac{7}{8} = \square$$

$$\frac{3}{5} \times \frac{4}{5} = \square$$

$$\frac{1}{6} \times \frac{7}{16} = \square$$

$$\frac{2}{9} \times \frac{4}{9} = \square$$

$$\frac{11}{12} \times \frac{5}{6} = \square$$

$$\frac{4}{15} \times \frac{1}{3} = \square$$

$$\frac{5}{6} \times \frac{7}{11} = \square$$

$$\frac{12}{13} \times \frac{1}{5} = \square$$

$$\frac{1}{10} \times \frac{7}{9} = \square$$

$$\frac{1}{14} \times \frac{5}{6} = \square$$

$$\frac{5}{12} \times \frac{5}{12} = \square$$
