

**Identifying Numerators and Denominators**

Write the numerator and denominator of each fraction given below.

Fraction =  $\frac{2}{11}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{4}{7}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{7}{10}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{13}{20}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{1}{9}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{15}{16}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{4}{11}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{3}{8}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{7}{13}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{7}{8}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{8}{9}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{21}{25}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{16}{23}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{2}{7}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_

Fraction =  $\frac{3}{29}$     Numerator = \_\_\_\_\_    Denominator = \_\_\_\_\_
