

Simplifying Mixed Numbers

Reduce each mixed number to its lowest terms.

1) $8\frac{88}{99} =$ <input type="text"/>	2) $12\frac{75}{85} =$ <input type="text"/>
3) $17\frac{76}{95} =$ <input type="text"/>	4) $5\frac{42}{98} =$ <input type="text"/>
5) $4\frac{72}{112} =$ <input type="text"/>	6) $10\frac{90}{102} =$ <input type="text"/>
7) $3\frac{49}{147} =$ <input type="text"/>	8) $14\frac{77}{140} =$ <input type="text"/>
9) $2\frac{52}{117} =$ <input type="text"/>	10) $5\frac{16}{192} =$ <input type="text"/>
11) $7\frac{63}{81} =$ <input type="text"/>	12) $6\frac{72}{100} =$ <input type="text"/>
13) $11\frac{90}{180} =$ <input type="text"/>	14) $9\frac{48}{72} =$ <input type="text"/>
15) $1\frac{75}{120} =$ <input type="text"/>	16) $4\frac{51}{119} =$ <input type="text"/>
