

Equation of a Line

- 1) AC is the diagonal of the rectangle ABCD. Find the equation of the diagonal.

- 2) A line p cuts the x-axis at M (8, 0) and y-axis at N (0, -10). Find the equation of the line p .

- 3) Find the equation of the tangent whose slope is -9 and touches the circle at the point $(-2, 3)$.

- 4) RST is a triangle. The equation of the line RS is $y = x + 1$ and it is perpendicular to the line UT that passes through the point $(-5, -7)$. Find the equation of the line UT.

- 5) The lines u and v intersect at the point $Q(4, 3)$. Line v passes through the point $E(-2, 9)$ and line u passes through the point $F(1, -3)$. Find the equation of the lines u and v .
