

Solve by Factoring

Solve the quadratic equations using the method of factoring.

$(x - 3)(x + 7) = 0$	$(x + 2)(x - 1) = 0$
$(2x - 1)(x + 3) = 0$	$(x - 5)(x - 4) = 0$
$(3x - 4)(6x + 1) = 0$	$(4x + 3)(2x + 1) = 0$
