

**Formation of Quadratic Equation**

Form the quadratic equation using the variable 'x' for the given pair of roots.

$1 \text{ and } \frac{1}{2}$  Quadratic equation:	$-3 \text{ and } \frac{2}{5}$  Quadratic equation:
$\frac{3}{4} \text{ and } -\frac{2}{3}$  Quadratic equation:	$\frac{3}{5} \text{ and } -1$  Quadratic equation:
$-\frac{3}{7} \text{ and } -\frac{2}{7}$  Quadratic equation:	$-\frac{1}{2} \text{ and } 3$  Quadratic equation:
$\frac{5}{6} \text{ and } -\frac{2}{5}$  Quadratic equation:	$\frac{1}{2} \text{ and } -\frac{1}{4}$  Quadratic equation:
