

## Finding Slope

WS #1

Find the slope using two-point formula.

1) $(3, 5)$ and $(-2, -2)$  Slope = <input type="text"/>	2) $(4, -1)$ and $(-5, 9)$  Slope = <input type="text"/>	3) $(8, -5)$ and $(4, -2)$  Slope = <input type="text"/>
4) $(1, 6)$ and $(-7, 2)$  Slope = <input type="text"/>	5) $(0, 3)$ and $(7, 3)$  Slope = <input type="text"/>	6) $(-8, 2)$ and $(-2, -6)$  Slope = <input type="text"/>
7) $(-7, 4)$ and $(-2, -1)$  Slope = <input type="text"/>	8) $(-4, 1)$ and $(-5, -3)$  Slope = <input type="text"/>	9) $(4, 2)$ and $(4, 6)$  Slope = <input type="text"/>
10) $(-3, 1)$ and $(-3, -4)$  Slope = <input type="text"/>	11) $(0, -7)$ and $(-1, -3)$  Slope = <input type="text"/>	12) $(2, -1)$ and $(-2, -1)$  Slope = <input type="text"/>
13) $(-2, 4)$ and $(5, 1)$  Slope = <input type="text"/>	14) $(7, 1)$ and $(-4, 0)$  Slope = <input type="text"/>	15) $(1, 8)$ and $(-1, -8)$  Slope = <input type="text"/>
