

Finding Slope

WS #2

Find the slope using two-point formula.

1) $(2, -7)$ and $(-1, 6)$ Slope = <input type="text"/>	2) $(-3, 3)$ and $(7, 6)$ Slope = <input type="text"/>	3) $(-1, -9)$ and $(5, -6)$ Slope = <input type="text"/>
4) $(-4, 9)$ and $(-5, 8)$ Slope = <input type="text"/>	5) $(8, -3)$ and $(-7, -1)$ Slope = <input type="text"/>	6) $(-5, 3)$ and $(2, 6)$ Slope = <input type="text"/>
7) $(8, 5)$ and $(-9, 5)$ Slope = <input type="text"/>	8) $(-7, 2)$ and $(5, 1)$ Slope = <input type="text"/>	9) $(-4, 3)$ and $(-4, -7)$ Slope = <input type="text"/>
10) $(-6, 1)$ and $(3, 5)$ Slope = <input type="text"/>	11) $(1, -9)$ and $(1, -6)$ Slope = <input type="text"/>	12) $(-8, -3)$ and $(-4, 2)$ Slope = <input type="text"/>
13) $(2, 3)$ and $(7, -6)$ Slope = <input type="text"/>	14) $(1, -8)$ and $(5, 3)$ Slope = <input type="text"/>	15) $(3, -9)$ and $(-4, -9)$ Slope = <input type="text"/>
